Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or fairly suggest passing of the external clock signal responsive to the comparison signal, delays the external clock signal for a predetermined time, inverts the delayed external clock signal, and generates the internal clock signal as having a pulse width smaller than a pulse width of the external clock signal by performing a NAND operation on the external clock signal and the inverted delayed external clock signal, the internal clock signal having rising and falling edges which are all synchronized with the external clock signal as called for in claim 1, transmission gate, having an input coupled to the external clock signal, that is switchably responsive to the comparison signal to selectively provide the external clock signal as a transmission gate output signal at a gate output terminal, an inverter circuit, coupled to the gate output terminal, that delays and inverts the transmission gate output signal to provide an inverter output signal, and a logical gate that performs a logical operation on the external clock signal and the inverter output signal to provide the internal clock signal as called for in claim 5. Therefore, claims 1-11 are presently allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuan T. Lam whose telephone number is 571-272-1744. The examiner can normally be reached on Monday to Friday (7:30 am to 6:00pm).
